

ABOUT THE BOOK

This book adopts an exegetical approach as well as a pedagogic model, making it attractive agriculture and environmental economics teachers, professional practitioners and scholars. It eschews pedantry and lays bare the issues in such clarity that conduces to learning. The book elaborates on contemporaneous climate smart actions (CSA) aquaculture, agroforestry and resources management issues of global significance and at the same time, is mindful of local or national perspectives making it appealing both to international and national interests. The book explores the ways in which climate smart actions (CSA) aquaculture, agroforestry and resources management issues are and should be presented to increase the public's stock of knowledge, increase awareness about burning issues and empower the scholars and public to engage in the participatory dialogue climate smart actions (CSA) aquaculture, agroforestry and resources management issues necessary in policy making process that will stimulate increase in food production and environmental sustainability.
